PROFILE

Full-stack developer and Information System Analyst II at the National Commission on Indigenous Peoples (NCIP), where I co-create the agency's in-house information systems with **Laravel**, React and MySQL, from requirements and development through testing, deployment and user training. Computer Engineering graduate with a field background in security systems, 780+ hours of technical training, and 2026 certifications in project management, Agile Scrum, and project scheduling and controls. Career Service Professional eligible.

TECHNICAL SKILLS

Back-end	**Laravel**, PHP, Node.js, Express.js, Back-end API (REST), Laravel Sanctum, C# / ASP.NET
Front-end	HTML5, CSS3, JavaScript (ES6+), React.js, Inertia.js, Tailwind CSS, Bootstrap, Responsive Web App, Web Design
Databases	MySQL, MongoDB, Eloquent ORM, Mongoose
Tools	Git, GitHub, GitLab, Postman, Vercel, Heroku, Vite, Pest, VS Code, Visual Studio, Microsoft Power BI
Practice	Full-stack development, system analysis, UAT & QA, technical documentation, end-user training, project management, Agile Scrum

EXPERIENCE

Information System Analyst II
Jun 2025 – Present

National Commission on Indigenous Peoples · Information and Communications Technology Division · Quezon City

- Co-created NCIP systems launched in 2026: the Data Repository on Indigenous Peoples (DRIP), the Project Development and Management Information System (PDMIS), the COC system, the IPS and IPO system, and the Single Sign-On (SSO) website of the IPSGSIS.
- PDMIS (Laravel 12, Inertia.js, React, MySQL): multi-level review, recommendation and approval workflows with return-for-revision, iPLUMA digital signing, PDF/Excel reporting, Sanctum API tokens and audit logging.
- Focal person for the Accounting and Budget Information System (ABIS).
- Conducted user training for employees on the Document Tracking System Version 2.
- Develop, enhance and maintain other NCIP in-house information systems.

Project Development Officer II
Jan 2024 – Jun 2025

National Commission on Indigenous Peoples · Information and Communications Technology Division · Contract of Service

- Collaborated on the development of the Document Tracking System Version 2 and the Quick Response Authenticator System (QRAS) for COC confirmation.
- Collaborated on enhancing the Educational Assistance Information System (EAIS) Version 3.
- Facilitated ABIS from requirements documentation and vendor and technology evaluation through procurement to deployment.
- Planned and conducted end-user orientations, technical trainings and workshops, and provided technical support.
- Performed testing and quality assurance; maintained documentation of system configurations, procedures and troubleshooting; monitored in-house systems.

Hardware & System Maintenance (On-call)
May 2018 – Dec 2022

Freelance

- Provided on-call hardware troubleshooting, repair and preventive maintenance for client computers and peripherals.
- Installed, configured and maintained operating systems, software and small networks, on site and remotely.

Systems Engineer
Dec 2016 – Apr 2018

Calvelo Engineered Systems Corp. · Security Systems Division · Makati City

- Achieved 100% project completion under my supervision, resulting in customer satisfaction; trained and mentored technicians.
- Delivered standalone and PC-based access control (cards, readers, keypads, biometrics, locks) integrated with management software.
- Delivered end-to-end network video surveillance solutions and installed security software systems for various industries.

EXPERIENCE (CONTINUED)

Project Support Engineer (OJT)

Jan 2015 – Jan 2016

MG Exeo Network Inc.

- Copper and fiber installation for PLDT home services; telephone cabinet troubleshooting following safety protocols.
